

Guard Tours

Design and measure guard tours all within the HiveWatch® GSOC Operating System

It's time to consolidate your systems and get rid of any physical readers you once used to monitor your guard's progress. Enhance your guard's patrol with HiveWatch Guard Tours all within the Guard Mobile App.

Features and Benefits

- Easily and quickly create as many checkpoints as needed, whenever they're needed
- Create and place route locations directly onto floor plans
- Create reusable checklists and update them in one central location
- Use the HiveWatch Guard Mobile App to scan checkpoints (no additional hardware needed) and ensure compliance
- Oversee patrol routes and activities of your guards
- Collect and view data of previous Guard Tours including completion, time, and user

How it Works

1. Create a checkpoint in the HiveWatch® GSOC Operating System, generating a QR code
2. Place the checkpoint on your digital floor plan
3. Have your guards use the HiveWatch Guard Mobile App to scan checkpoints (no additional hardware needed)
4. Collect and view data of Guard Tours including completion, time, and user
